Life is best in

steps. It's true. Steps are a gentle way to isolate a goal and precisely achieve it. That's why *FINISH* by Wagner and all its projects are broken down into the easiest steps possible. It's not just to show the ease of the paint sprayer and other Wagner products, but also to help accomplish all the necessary elements of completing a project. A paint sprayer will reinvent walls, furnishings, and fences. It will also unleash creativity—aiding in creating your own personal style and design patterns. Bringing family and friends together to accomplish projects as a team, helping complete updates to your home that will be not only beautiful, but also add value. So get a paint sprayer and **spray your world!**

Every friend and family member is more than just moral support in the effort of painting a house.

SMOOTH SAILING

The only thing between you and a stylish boat is some painter's tape and a FLEXiO® 890 with detail front end attachment. Marine paint is designed to hold up in water and inclement weather. It comes in a myriad of colors and can turn your ho hum boat into something extremely memorable.

FINISH with Wagner Magazine is published in partnership with Matthew Mead Productions and Wagner SprayTech Inc. The editorial content is intended to explain and simplify home improvement projects. Tools, products, materials and techniques are intended to be a guide; therefore, Wagner SprayTech Inc. and Matthew Mead Productions assume no liability for omissions, errors or the outcomes of any project. Readers should follow all product manuals and material manufacturers' guidelines. Results may vary.

All rights reserved. Neither this publication nor any part of it may be reproduced or transmitted in any form or by any means electronic, mechanical, photocopying, recording or otherwise, without permission of Wagner SprayTech Inc.

FINISH with Wagner is a digital look book published quarterly.

Wagner Tools Used:
FLEXIO® 890

1. Prime the boat white both inside and out with marine primer paint.
2. Tape off a design pattern with painter's tape.
3. Paint each part of the boat with your colors of choice.

Stencil a Window Screen

Stencil your design on the inside of the screen to help protect paint from the weather.

Add summer charm and whimsy to any outdoor screen by embellishing it with a stencil. We added the dandelion stencil to a window screen, but you could do the same thing to a screen door or pantry cupboard.

1. Clean and dust off the screen using a dusting brush.
2. Attach a stencil to the screen using painter's tape. Spray over the design until stencil cutouts are covered with paint.
3. Remove the tape and install the screen in a window casing.

Wagner Tools Used:
Home Décor sprayer

Stenciling is an old design style that dates back to Egyptian times. The design style is often used in place of fancy and expensive wall coverings and was used to add personal style to interiors that were somewhat boring. The use of a Wagner paint sprayer reinvents the technique creating crisp and sharp design renditions easily and quickly.

pretty painted glass

An old transom window is upstyled into a glass porch divider to separate a seating area from a dining space. Add the same style to interior windows, doors, and cabinet panels.

- 1.** Clean the glass thoroughly before placing the stencil and applying paint.
- 2.** Tape the stencil to the glass and protect painted frame with additional masking.
- 3.** Spray the stencil pattern using the detail nozzle. Hold the nozzle 3-5 inches from the window surface when spraying. Remove the tape and stencil to reveal pattern.

Wagner Tools Used:
Studio Pro sprayer

Painting glass creates translucent privacy to any space glass exists. Add character with a stencil in any color you desire.

Surf's Up!

Surfboards aren't just for the beach anymore . . . use some blue tape and a detailed front end and spray a personalized pattern that fits your style. Then show it off on the beach, as a home accent or as a seasonal coffee table.

Marine paint comes in a plethora of colors and with a bit of painter's tape you can create a multicolored pattern all your own.

Wagner Tools Used:
Studio Plus sprayer

1. Select two or three colors that work well together. We used a plaid summer shirt as color inspiration.

2. Wash, wipe and dry board. For the best final finish, coat the surf board with oil based primer. Dry thoroughly.

3. With a ruler, mark and tape off a design. Line the front end detail nozzle sprayer cup with a plastic liner to make cleanup a breeze, and then fill with paint. Spray an even coat of paint over a taped-off surface. Let dry and repeat with second color. Remove tape immediately and continue drying for 24 hours.

Spray colors and designs of your choice to personalize and upstyle your surfboard.

good vibrations

Spray over your world with fresh summer colors and simple step-by-step designs that create a heaven of an outdoor space.

Easy projects with the FURNO heat gun and Studio paint sprayer add fresh design to tables, paint trays and illuminating candles. Follow our designs to recreate these on your own porch.

You can
reinvent a
grouping of
wicker furniture in
an afternoon.

navigator's table

Perky colors and interesting designs move a cast-off coffee table into a starring role helping you navigate a stylish summer.

1. Spray a table with coat of white paint.
2. Arrange wood circles in two sizes in a random pattern across the table top.
3. Spray over the circles with a Studio Pro sprayer in your favorite shade of paint.
4. Remove the wood circles to reveal the pattern. Let dry completely.

All kinds of found items can be used as stencil designs. These wood wreath forms can be found at the craft store. You can also find an array of graphic stencil designs there.

wicker chairs

Wicker furniture becomes faded and worn without proper care. Use the Wagner brand of paint sprayers to protect your wicker and revive it with current colors.

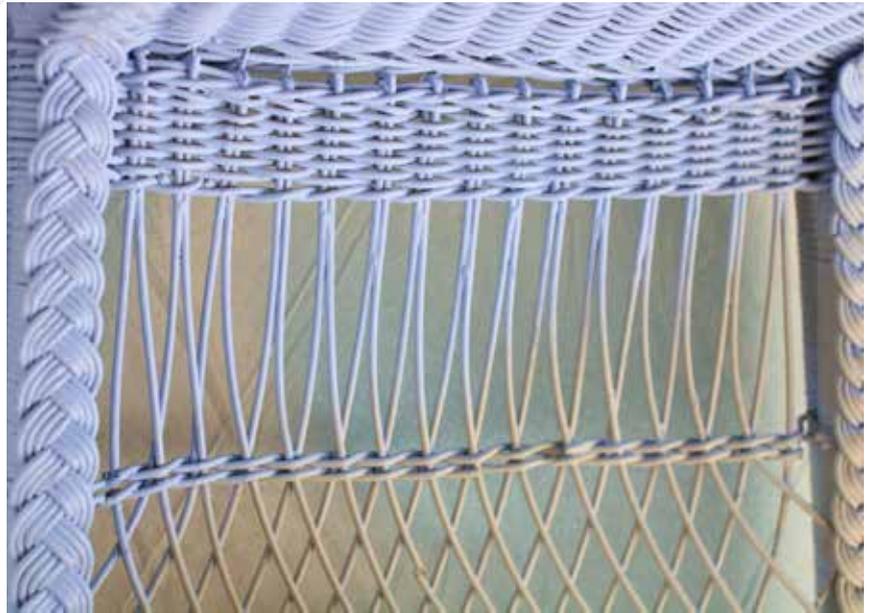

1. Clean and wipe down the wicker piece. Use the blower effect on the sprayer without using a nozzle to clean dust stuck between the weave.
2. Line the sprayer paint cup with a plastic liner and fill with your desired color of paint.
3. Using the detail nozzle, hold the sprayer three inches away from the surface and paint in a back and forth horizontal pattern. Let dry.

To create a bicolor wicker look, first spray half in one color and let dry. Then, tape off the painted edge and spray in a complimentary color.

experience the sprayer at its best

The sprayer is miraculous at delivering paint to every nook and cranny of intricately designed wicker.

Painting delicate wicker furniture by hand can take days. Spray it with a Wagner paint sprayer in minutes. For easy results, hang the piece in the air with a paint cloth spread out underneath the piece. If not possible to hang, simply keep turning the piece to cover all edges of the furniture.

seaside pillows

The Wagner Studio Pro paint sprayer creates defined stencils with a crisp edge. Use painter's tape, a stencil, and your favorite colors and designs to create these easy summer patterns.

1. Remove the pillow from fabric case.
2. Center a stencil on the pillowcase and tack to mount on a wall covered with a drop cloth.
3. Using the detail nozzle, spray paint in an even side-to-side motion, holding the sprayer about three inches from the surface. Let dry completely before using.

Fabric paints and chalky style paint are all great on fabrics and to use with stencils. For latex paint, simply dilute paint by a third to create a mixture that will absorb into fabric better than simply applying the paint on top.

Words, symbols, numbers or graphic designs are all possible subjects for pillow art. Use commercial stencils or make your own with mylar paper and painter's tape.

FINDING STENCILS

Craft stores and art supply shops have a mix of modern and detailed stencil designs.

Hand-pick from a variety of choices or search online for stencils that are truly in line with your design sensibility. Wipe excess paint from stencils and store them flat to reuse designs over and over again.

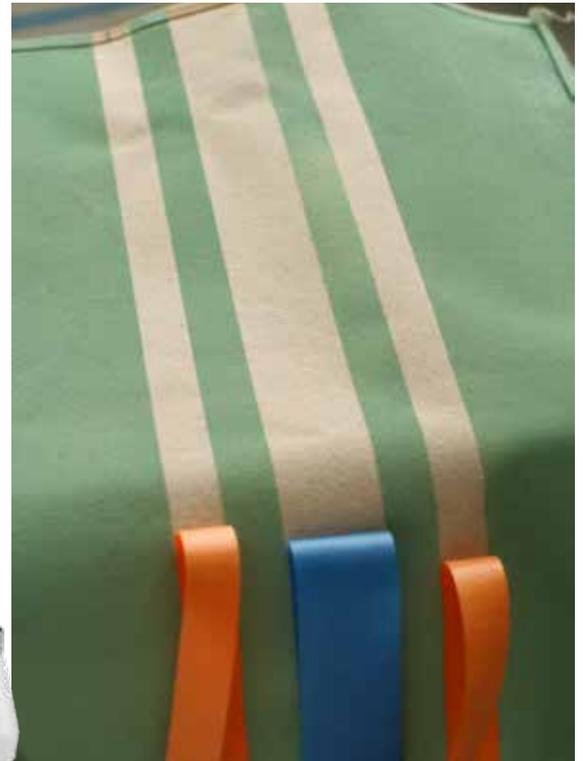

seafoam floor cloth

Create an easy and breezy floor cloth with painter's tape and paint.

1. Spray a canvas cloth with cream-colored paint and let dry completely.
2. Use a ruler to create even and parallel stripes with painter's tape on the canvas.
3. Spray over the tape until the open stripes are covered with color. Remove tape to show the stripe pattern.

Floor cloths are great for summertime porch rugs. They catch dirt and sand that comes in on sneakers and flip flops. Use them to keep entry doors and walkways tidy.

A piece of fabric with a green and tan striped pattern. A white starfish is placed on the fabric. In the background, there is a piece of light-colored fabric with a blue pattern and a red border.

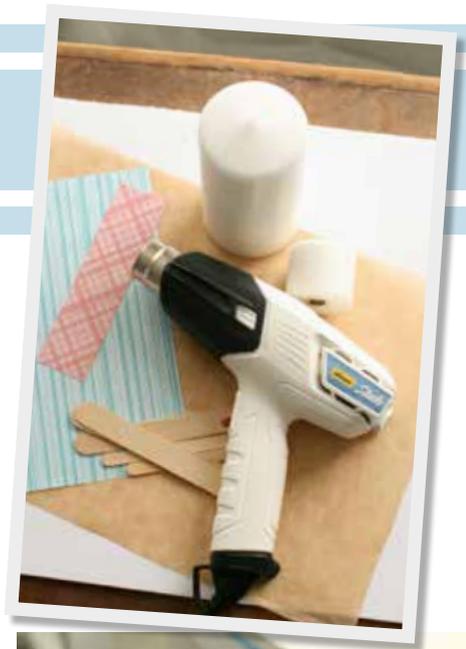

Patterns are easy to create and design using only painter's tape and a sprayer. Think argyle, trellis, blocks and plaids . . . they are all easy and possible designs that you can mark off with the tape and spray over with your favorite paint colors.

Tape and paint create an instant and refreshing summer pattern.

candle wraps

Heat up your next porch party with these colorful and graphic pillar candles.

1. Cut gift wrap or scrapbook paper to fit the height of your pillar candles.
2. Heat the sides of the candle with a heat gun to just before melting point—about 30 seconds or so. Attach paper to the soft wax and smooth down the paper surface with a tongue depressor.
3. Arrange candles as a centerpiece. As with all candles, keep them within sight and out of the reach of children. Trim excess paper as the candle burns down.

As you melt the candle keep smoothing the paper with the depressor. Wax will coat paper and adhere it to the candle shape.

Studio Pro sprayer
Studio heat gun

glorious shade

A hanging shade is a stylish way to add evening light to a porch. Add a stencil to "spray it up" a notch.

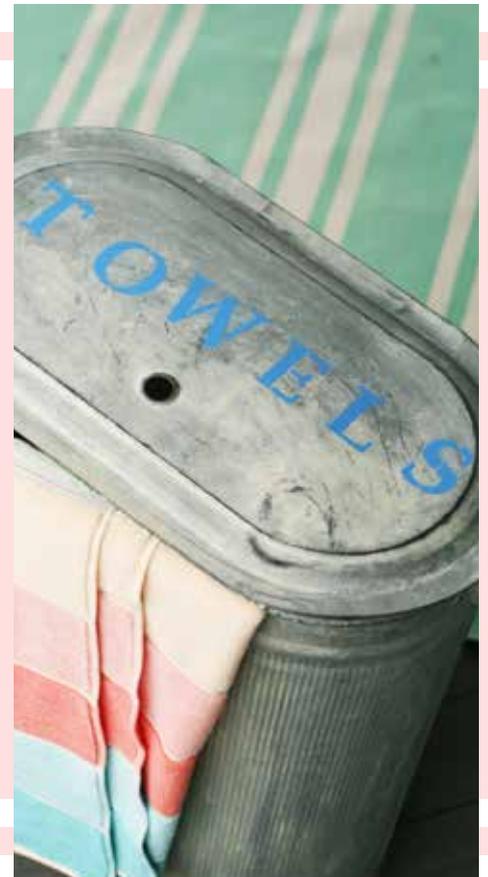

- 1.** Use painter's tape to adhere a stencil design to the lampshade.
- 2.** Spray over the design using the detail nozzle on your paint sprayer.
- 3.** Remove the tape and stencil design to reveal graphic pattern. Light at night to show off design.

towel bin

A place for everything and everything in its place. Create a towel bin for sandy beach towels.

- 1.** Create your word or saying using stencil letters.
- 2.** Tape into place using painter's tape to cover the areas you want to shield from paint.
- 3.** Spray over the stencil and then remove the tape to reveal your personalized message.

RAVENOUS.

THE WAGNER PAINTEATER.®

Ideal for removing paint and paint chips without damaging the substrate. Use it on siding, trim, concrete block, metal and masonry. It's always ready for seconds.

Buy it now at wagnerspraytech.com.

The logo features a black triangle above the word "WAGNER" in a bold, black, sans-serif font, all contained within a yellow rectangular background.

PAINT SMART.®

HOUSE
PAINING
PARTY

Gather friends, family, and food to upstyle your home with a fresh coat of paint and get your house ready for the seasons ahead. Many hands make light and FUN work!

Learn how to make these candles on page 24!

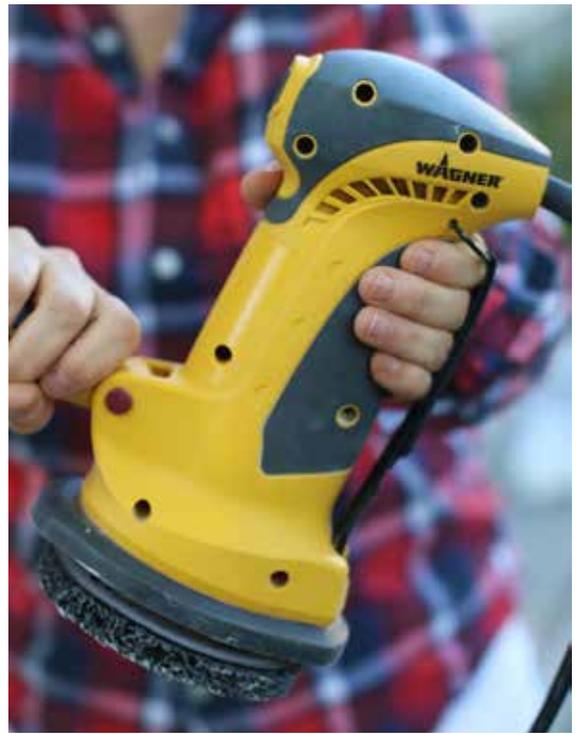

Step 1 Sanding

Turn a chore into an afternoon delight. Use the Wagner PaintEATER® to easily loosen flaking paint and create a smooth surface for a fresh coat. Fun paint shirts were gathered at a thrift shop to give the guests a team feel. Everyone gets a turn sanding and changing up the sanding disc. The PaintEATER® glides easily over the surface without gouging or over sanding the siding.

SAND
AND
DELIVER

Painter team shirts are thrift store finds in red, white, and blue.

Assemble all your ladders, extension cords, sanding discs, and paint tools in one place. To determine the amount of paint needed to paint your home, provide the square footage of your home to your paint dealer.

Step 2 Painting

The spraying process has two applications. Using a FLEXiO® 990 sprayer, which draws off a 5 gallon bucket of paint, spray the bare wood surfaces with primer to seal them from the elements. Then spray the house with a latex exterior paint. The FLEXiO® 990 is lightweight and easy to maneuver, especially from a ladder and for hard to reach places.

Wagner Tools Used:
PaintEATER®
FLEXiO® 990

Drop cloths are essential for covering items like bulkheads and patio stones where paint spills are not wanted. Let all your guests take turns trying the sprayer.

Step 3 *Partying*

Hard work will create a hungry crowd. Have plenty of icy drinks on hand and easy make-ahead foods that are delicious and can be replenished in a jiff. Keep the theme by using red, white and blue dishes.

Pulled pork on a bun with coleslaw, fresh fruit salad, raspberry squares, watermelon, and a cake that looks like a burger will be tempting to all your house painters.

Tropical Stencils

Set a stylish summer scene with tropical stencils that upstyle items that were destined for donation.

This wall screen makes for a quick change by the pool.

Stencil it Special

Here's how to add pattern to anything.

1. Buy a stencil or create one using mylar or contact paper.

2. Attach the stencil to furnishing with painter's tape or low tack spray adhesive.

3. Fill your Wagner sprayer with paint and spray evenly over the stencil until covered with color.

4. Remove the stencil and reveal your pattern instantly.
Works great on beach totes, towels, and hats. An old dressing screen brings to mind a polka dot bikini.

Make the polka dots from a few different-sized irregular shapes cut from contact paper.

Decorative Seashell Art

The Home Décor sprayer is the perfect Wagner tool to add style to any item that needs upcycling. But any Wagner sprayer will give you a crisp and beautiful stencil design.

1. Assemble your supplies: the Wagner sprayer, your favorite paint, painter's tape, and a low tack spray adhesive.
2. Select a stencil design that fits your mood. Beach art looks great on weathered, painted pieces of wood.
3. Tape down your stencil design. Use additional tape to create a border to prevent overspray.
4. Spray over the design at 3-4 inches from surface. Remove stencil to show relief.

An old wood board with stencil and paint becomes an instant piece of beach art.

Only three steps to add style and apply a beautiful and enduring spray of paint.

Wagner Tools Used:
Studio Pro sprayer
Home Décor sprayer

Paint a planter with leftover paint.

Layer by Layer

Add complex color to stencils by layering the stencils in steps. Simply allow some time for the paint to dry in between the mix of the pattern and paint colors. The result will add depth to your overall design. A cupboard makes use of an art canvas to create a stunning door of philodendron leaves. A stencil of hibiscus flowers covers a soft canvas fabric that can be used as wall art or a floor cloth.

If you have the sprayer out, line up a lot of projects at once. The cupboard and chair were both sprayed with the same shade of cream paint.

FABULOUS FLOATS

Make summer memorable in the colors that you love. Paint inner tubes with a marine paint that holds up in sand and salt water.

- 1.** Line the sprayer cup with a plastic liner. Equip the detail nozzle. Spray the entire inner tube with white primer.
- 2.** Tape off stripe patterns on the inner tubes. Think both horizontal and vertical stripes.
- 3.** Spray colors in stages by letting the paint dry thoroughly between colors. Wash off after a sandy day at the beach and store in a cool dry place.

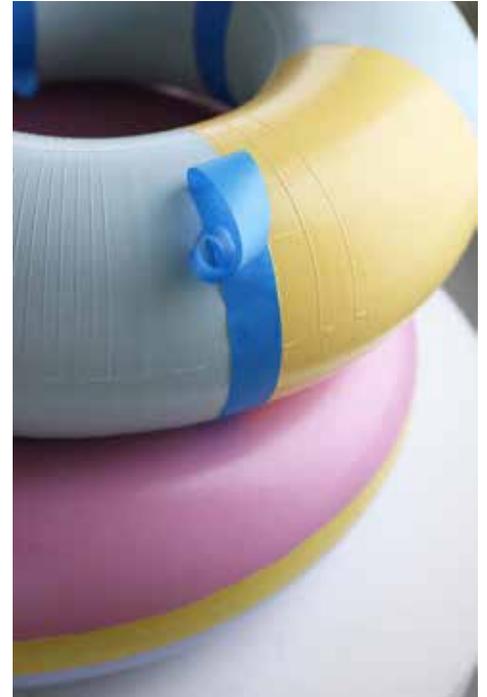

▲ Find inner tubes online or at a local tire store.

Wagner Tools Used:
Studio Plus sprayer

Paint on summer with colorful stripes and style. Add designs to lawn chairs, umbrellas, planters, and more ...

Door Prize

Nothing freshens up your summer style like a newly sprayed exterior door. Upcycling box store finds with great color and style means you can welcome guests and neighbors to your own warm weather retreat. Fire up a sprayer and totally revamp your curb appeal for the season.

A louvered door is as easy as painting a basket or wicker chair. Spray it with the Studio Pro and transform your home's street presence in minutes.

1. Spray the door with a white water-based primer and let dry completely.
2. Add house numbers or flower stencils to the center of door using push pins.
3. Spray over the door with your color of choice in an exterior latex paint.
4. Remove the stencils to show off your graphic design.
